Summary

Frontend Developer with hands-on experience in React.js and Next.js, focused on building clean, production-ready user interfaces and real-world web applications.

Work Experience

Freelancing

Jan 2026 - Present

Frontend Developer

- Developed responsive web applications using Next.js, React, and Tailwind CSS, focusing on clean UI and performance.
- Integrated APIs, authentication, and handled dynamic data with real-world problem solving.

Meta Scifor Technologies

Oct 2025 - Jan 2026

Frontend Developer Internship

- Built responsive and reusable UI components for an LMS platform using React and Next.js.
- Followed clean component architecture and modern UI practices to improve usability.

Technical Skills

Languages: JavaScript, TypeScript

Developer Tools: VS Code, Cursor, Postman

Technologies/Frameworks: Next.js, React.js, Tailwind CSS, Redux, Motion, Git, GitHub, Photoshop

Projects

Tripping – Trip Planning App (Client Project)

Technologies: Next.js, TypeScript, Tailwind CSS, Shadcn/ui, Firebase, Google Map Api

- Built a complete trip planning system where users can create trips, add activities, and manage daily timelines.
- Implemented complex drag-and-drop logic to move activities between timeline and panel with proper time adjustment
- Handled real-time updates and state sync while managing activities, transport, and schedule changes.
- Integrated APIs for trip, plan, activity, and transport management, including create, update, and delete operations.
- Developed a custom time-based scheduling system to manage activity duration .
- Built transport flow between activities, handling distance, sequence, and proper placement in timeline.
- Integrated Google Maps with markers, routes, and place autocomplete for location selection and visualization.
- Implemented Firebase authentication and managed user-specific trip data securely

Resume.ai – AI Resume Analyzer

Technologies: Next.js, TypeScript, Supabase, Tailwind CSS, Gemini, Shadcn/ui

- Built an AI-powered resume analyzer providing ATS scoring, role-based feedback, and smart improvement suggestions.
- Intelligent suggestions to improve content clarity, keywords, formatting, and overall resume impact.
- Voice-enabled resume analysis with text-to-speech support, enhancing accessibility and user experience.
- Secure authentication system with protected routes and user-based resume history management.
- Real-time feedback with a modern, responsive UI built using shadcn/ui and Magic UI, featuring dark mode support.
